

R R STONE
Solutions for Stone

Intensive is a very penetrative degreasant/dewaxer for stone, concrete, slate surfaces. Based on non-toxic, low volatility, biodegradable solvents and surfactants.

Because of the low volatility, it can be allowed to dwell on the surface to be cleaned for prolonged periods without drying or causing build-up of solvent vapours in areas of poor ventilation.

Intensive will dissolve both superficial and ingrained oils, greases and most waxes and soften chewing gums, tars and similar substances, it will also loosen many water soluble stains.

On addition of water, the surfactants keep the dissolved soils in suspension to allow vacuum extraction or rinsing/mopping.

USES

- Degreasing and dewaxing of Kitchen, bathroom/toilet etc. Surfaces.
- Removal of ingrained grease stains from both the stone/slate and grout within the floor.

APPLICATION

- Remove all loose dust and debris and ensure surface is dry.
- Apply Intensive neat to the surface be treated with a soft brush, roller etc.
- Allow to dwell on the surface until soiling is loosened, if necessary agitate with wire wool/stiff brush and allow to dwell for further period.
- After approx. 15-30mins, rinse off with cold water and extract with wet vacuum or squeegee.
- Rinse again with cold water- repeat if rinse water goes milky.
- Allow surface to dry.

HEALTH AND SAFETY

Intensive contains only low hazard components but working practice recommendations are:

- Do not inhale fumes/vapours/sprays-ensure adequate ventilation or use respirator.
- Do not smoke.
- Keep away from children
- Do not swallow
- Avoid contact with skin or eyes-use rubber gloves, goggles etc.
- Do not dispose directly into sewers.
- In case of skin contact, rinse thoroughly with clean water and wash with soap and water.
- If swallowed, give milk or cream and seek medical attention. If user is affected by fumes remove immediately and lie down (in recovery position) and seek medical attention.
- Small spillage's should be flushed away with large quantities of water. Large spillages should be absorbed in sand/earth etc. and disposed of in accordance to local regulations.

AVAILABILITY

1 litre and 5 litre cans.

IMPORTANT: This information is provided for the guidance of prospective users: no liability, either express or implied, can be undertaken by the manufacturer - it is the responsibility of the intending user to determine fitness for purpose, although the manufacturers endeavour to ensure that the best advice and recommendations are given, based on laboratory and field experience. Liability is limited to replacement of materials found to be defective in materials or manufacture.
